

Let's **BEGIN!**

Ready to get started with your new **SMART** Dehumidifier?

This quick start guide shows you how to set up and start.

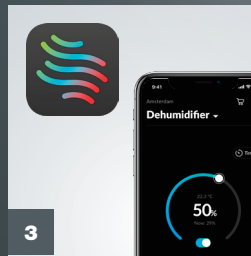

1

After unpacking your dehumidifier, place the unit upright for 2 to 4 hours before use.

2

Plug the dehumidifier to a socket and press the on/off button on top of the device.

3

Install the Homewizard Climate app on your smartphone.

4

Hold Wi-Fi button for 6 seconds to beep 3 times.

5

Follow the instructions in the app to connect your smart dehumidifier.

You have made a smart choice

Congratulations on your smart dehumidifier purchase!

More and more products become smart in our home. Princess is one of the leading producers of small domestic appliances with an extensive collection of smart products. The appliances are not only smart, but they also fit perfectly in your interior.

For this venture, Princess joined forces with HomeWizard, our inhouse R&D centre. With HomeWizard's smart software we are able to create applications that meet your needs and are safe. With the HomeWizard Climate app we guarantee to protect your personal information and the app is GDPR-proof. It is based on European servers with advanced data-encryption. **Safe & convenient!**

This Princess smart dehumidifier is part of a wide range of smart home items that can be controlled with your smartphone. Interested in other smart products or more information? **Visit www.princesshome.eu/smart-products**

Enjoy your smart dehumidifier!
